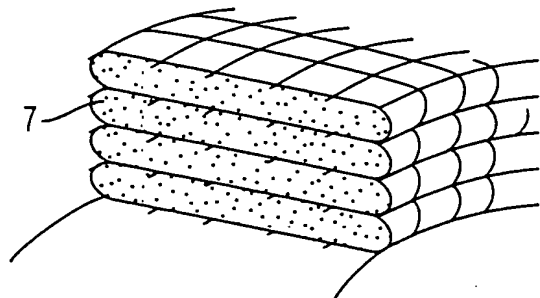

FIG. 3

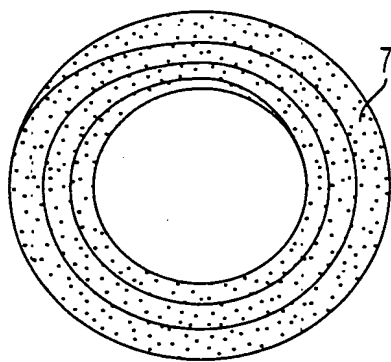

FIG. 3A

Figure 5 is a schematic diagram of a circular structure, possibly a cross-section of a ring or a disk, featuring a central circular hole. The structure is defined by a large outer circle (5) and a smaller inner circle (5'). The annular region between the two circles is filled with a pattern of elongated, irregular shapes (5'a), which appear to be distributed randomly or in a specific arrangement. The shapes are oriented radially, with some pointing towards the center and others pointing away from it. The label 5'a points to one of these shapes, and the label 5 points to the outer boundary of the structure.
